## Professional Summary

Results-driven Web Developer, Blockchain Enthusiast & Cloud Computing Advocate with experience in freelancing and IT projects. Adept at building scalable web applications, blockchain solutions, cloud architectures, and data-driven models. Passionate about leveraging innovative technologies like React, Node.js, Solidity, Python, and AWS Cloud to solve real-world problems.

## Skills and Expertise

- Technical Skills: React.js , javaScript, Python, NodeJs, Solidity, MongoDB, Tailwind CSS,HTML
- Blockchain & Web3: Smart Contracts, Thirdweb, Remix
- Cloud Computing : AWS Cloud,Cloud Architecture
- Soft Skills: Leadership,Communication, Problem Solving, Team collaboration

## Professional Experience

### Freelancer ( Microtasks & AI Training )

#### Remotasks , Outliers | Remote

[01/2024] – [Present]

- Contributed to AI training datasets by annotating and processing structured data.
- Assisted in model training tasks for computer vision and natural language processing projects.

## Education

### Master of Computer Applications (MCA) | Yenepoya University (Present) | 8.82 CGPA

[02/2023] – [Present]

Data Science and Big Data Analytics

### Bachelor of Computer Applications (BCA)| Mangalore University | 8.68 CGPA

[06/2020] – [06/2023]

## Key Projects

### Crowdfunding Platform (Blockchain-Based)

Technologies Used: Solidity, Thirdweb, Ethereum, React.js

- Developed a decentralized crowdfunding system, eliminating intermediaries , ensuring secure fund transfers.

### Crypto Price Bot

Technologies Used: Python, JavaScript

- Created a real-time bot that fetches and updates crypto prices every minute, reducing manual effort.

### Decentralized File Storage System

Tech Stack: AWS S3 / IPFS, Node.js, React, Solidity

- Built a cloud-based file storage system where users can upload, encrypt, and share files securely.

## Certifications

- AWS Cloud Practitioner Essentials – AWS training
- Ethereum Bootcamp - Alchemy
- Big data Specialization – Infosys SpringBoard
